

Math Puzzler #25

Due 4-12-16

Name _____

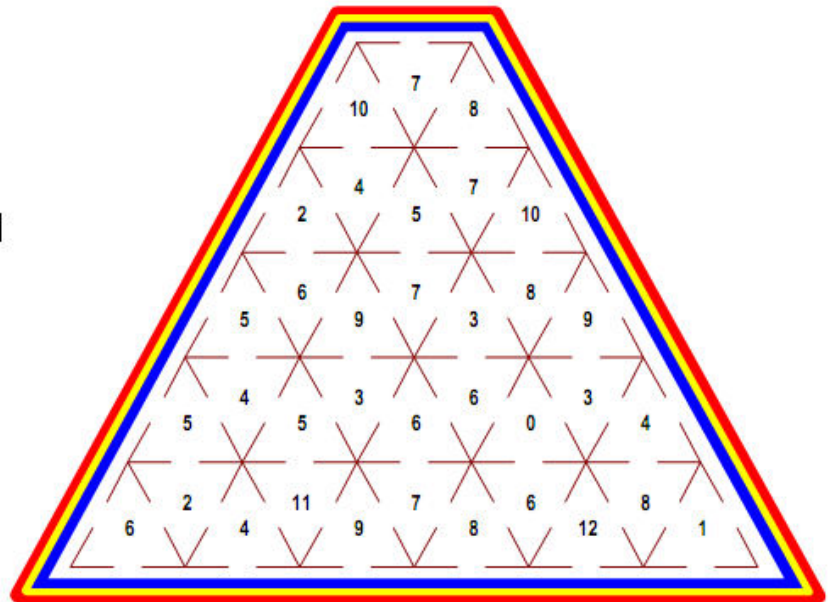

Hour _____

Date _____

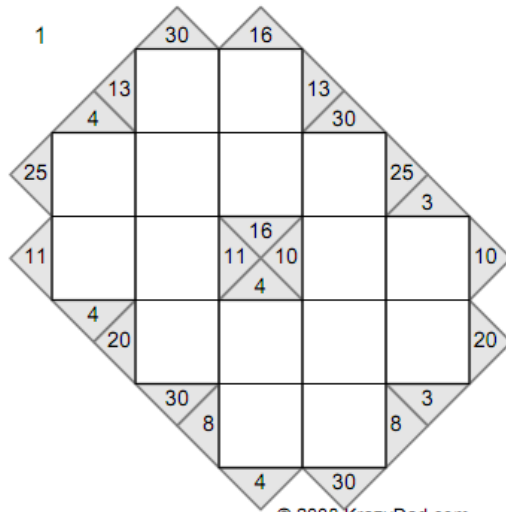

- To solve the trigon puzzle, fill in all open triangle sides so that the three numbers add to the number in the center. The number combinations you can use are listed to the left, cross them off as you use them as they will only be used once.

0	000
1	001
2	002 011
3	003 012 111
4	004 013 022 112
5	014 023 113 122
6	024 033 114 123 222
7	034 124 133 223
8	044 134 224 233
9	144 234 333
10	244 334
11	344
12	444

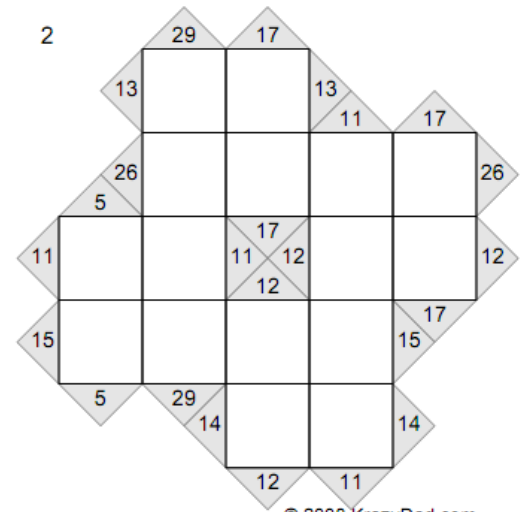

Game No 5d 1
Difficulty: Easy

- To solve the Kakuro puzzles below. Place numbers in each row or column so they add to the number to the top, bottom right or left of the column. Only the numbers 1-9 can be used and there can be no repeated number in any row or column
